

International Stock Index

Retiree Health Funding Vehicle (RHFV) and
Investment Services Program (ISP)

Total Fund Assets: **\$1.03 billion**

Fund Category: **International Stock Index**

Total Annual Operating Expense: **0.26%**

Objective

The International Stock Index seeks to replicate the total return of the MSCI EAFE Index.

Portfolio Management

MERS manages the asset allocation and monitors the underlying investment managers of the International Stock Index. The International Stock Index is part of the MERS Total Market Fund.

Fee and Expense Information

Administrative Fee	0.18%	Costs related to bookkeeping, settling trade activity, and holding assets in custody at a bank and running the day-to-day operations of the plan, which include legal, accounting, auditing, compliance, printing, and overhead costs.
Investment Management Expense	0.08%	All costs incurred in the direct management of the fund. These vary based on level of assets and are expected to decline as assets increase.
Total Annual Operating Expense	0.26%	This total reduces the rate of return of the fund. This means that for every \$1,000 invested in the MERS International Stock Index, a participant is charged \$2.60 in fees a year.

Fund Restrictions

The International Stock Index has no restrictions.

Performance Information as of 03/31/19

	Quarter	Year to Date	1 Year	3 Years	5 Years	10 Years
International Stock Index	9.46%	9.46%	-3.92%	7.18%	2.03%	--
MSCI EAFE Index	9.98%	9.98%	-3.71%	7.27%	2.33%	--
Standard Deviation	--	--	13.10%	10.17%	11.32%	--

Returns for periods greater than one year are annualized.

Standard Deviation measures the distribution of returns around the average return. The more spread apart the data, the higher the deviation.

Returns are calculated net of the Investment Management Expense for periods after October 1, 2014. Prior to this date, returns are calculated net of both the Investment Management Expense and Administrative Fees.

Past performance is no guarantee of future results. Current performance may be higher or lower. Investment returns and values will fluctuate, and shares when redeemed, may be worth more or less than their original cost. Please visit the MERS website at www.mersofmich.com for more recent performance information.

MERS, as a governmental plan, is exempted by state and federal law from registration with the SEC. The MERS Funds consist of a portfolio of assets managed in a separate account in a collective trust, specifically for MERS Plans. Unlike a mutual fund, only the participants in a MERS Plan can invest in the MERS Funds. Because the MERS Funds are not mutual funds, a prospectus is not available.

This summary is designed to provide descriptive information only. Investors should research all possible investment choices. Please make independent investment decisions carefully and seek the assistance of independent experts where appropriate. We recommend investors define their goals, risk tolerance, time horizon, and investment objectives to determine whether this fund is appropriate for you. Please make independent investment decisions carefully and seek the assistance of independent experts where appropriate.

State Street Bank and Trust, as the custodian for the MERS Funds, calculates the unit value as of the close of business each day. The MERS Funds invest in a broad selection of securities. Some securities may not be priced daily or prices may be determined on a delayed basis. These securities are reflected in the unit value of the fund at their most recent market value adjusted for interim cash flows.

MERS Funds are constructed utilizing several underlying investment strategies within a particular asset class. Consequently, a fund's asset allocation may vary over time as a result of underlying manager activity.

Funds are subject to investment risks from a number of sources, including the management style of the fund and market volatility. Markets are volatile and can rise or decline significantly in response to company, political, regulatory, market or economic developments. A fund's total return, like securities prices generally, will fluctuate within a wide range. As a result, an investor could lose money over short or even long periods. Funds are also subject to investment-related risk, which is the chance that returns from companies invested in by the fund will trail returns from other asset classes or the overall market.

MERS has made every effort to ensure that the information provided is accurate and up to date. For more information, please contact the MERS Service Center at 800.767.MERS (6377) or visit www.mersofmich.com.
